

Wireless Water Resistant Digital Calipers -measurements straight to your PC or Android Phone

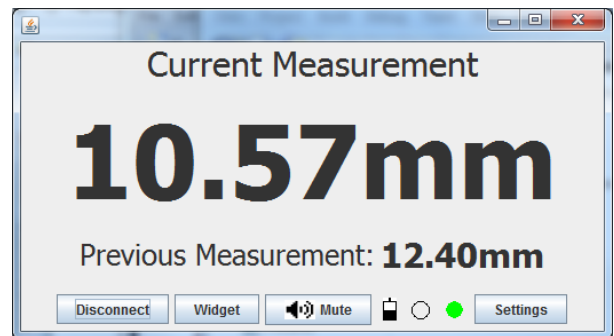

WEL wireless digital calipers allow measurements to be recorded directly into Excel™, Word™ or Microsoft Access™ by simply pushing the green "Read" button on top of the calipers.

With the use of the free Android application (available in February 2013) measurements can be made in the field direct to your phone for later use.

Tedious repetitive measurement tasks can now be performed much faster and more accurately with the ability to record each measurement in less than 1 second.

Available in 150mm (6") and 200mm (8") lengths the calipers are water resistant, designed tough for applications in the horticultural and metal processing industries.

Wireless communication is achieved using Bluetooth (a Bluetooth dongle is provided for PC use). Additionally a USB to micro USB lead is provided for battery charging. One charge will last several days continuous use.

Screen shot of interface loaded on PC, passes measurements straight to Excel etc in real-time.

Specifications:

Inductive absolute encoder.
 Measuring Range: 0-150mm or 0-200mm
 Resolution : 0.01mm
 Repeatability: 0.01mm
 Operating Temperature: 0°C- 40°C
 Relative Humidity : 0 - 100%
 Approx. hours use between recharge: 40 hours
 Recharge Time: 6 hours
 Blue led indicates: battery condition, charging, data send, connection to PC or phone.

System Requirements:

Windows XP, Windows 7
 or Android 2.2 and above.

Contents:

Caliper (150 or 200mm), USB to micro USB cable, Bluetooth dongle, CD with PC software (Android via Android store, free), instructions.
