

Apply frost control measures only where needed.

SmartLite™ is a portable, low cost, frost alert designed for the horticultural industry. Use with all types of frost protection methods e.g.

- Helicopters
- Frost fans
- Frost pot frost protection methods.

As the temperature approaches frost conditions SmartLite™ emits a bright coloured signal light. The colour of the light changes to indicate the temperature in the immediate area.

SmartLite™ STD

Temperature Colour Ranges :

< -1°C	Red Flash
-1° to 0°C	Red Constant
0° to +1°C	White Constant
+1° to +3°C	Green Constant

Made from high quality UV durable plastic SmartLite™ is designed for harsh environmental conditions.

Available Models:

SmartLite™ STD

SmartLite™ EX - extended range version.

< -2°C	Red Flash
-2° to -1°C	Red Constant
-1° to 0°C	White Constant
0° to +1°C	Green Constant

Boundary Light - use to mark out edge of boundary or hazards.

< 3°C	Orange Slow Flash
-------	-------------------

Specifications:

UV durable plastic case and long life LEDs

1.4m long temperature sensor.

0°C calibrated.

Rain proof.

“Good Health”, low battery and faulty sensor signaling.

Calibration error alarm.

6 Volt Lantern battery (**alkaline battery NOT required**).

4R26, 1209, 509, PJ996

(a low cost carbon zinc battery will generally last a season).

Made in New Zealand

12 month warranty against manufacturing defect.

This unit is not an absolute measuring device and should be used in conjunction with other measuring instruments to determine accurate temperature.
